#### SECTION C

#### **ENVIRONMENTAL MANAGEMENT SYSTEM ASSESSMENT**

Why do we need this information?
Facilities need to have implemented an EMS that meets certain criteria and use an ISO 14001:2004 EMS Lead Auditor at least every 36 months to assess the EMS.

What do you need to do? Answer the following questions about your EMS.

7	What is the most recent date that an ISO 14001:2004 EMS Lead Auditor performed an EMS assessment at your facility? 11/24/2013			
2	Is the date of the most recent EMS assessment performed by an ISO 14001:2004 EMS Lead Auditor within the past 36 months?			
	Yes—If yes, skip to Question 3.			
	No—If no, please have your ISO 14001: 2004 EMS Lead Auditor complete and sign the following checklist, indicating whether or not your EMS meets the listed criteria for ESP membership:			
	Yes No	Evidence of senior management support, commitment, and approval.		
	Yes No	A written environmental policy directed toward compliance, pollution prevention, and continuous improvement.		
	Yes No	Identification of the environmental aspects at the entity.		
	Yes No	Prioritization of the environmental aspects and a determination of those aspects deemed significant considering, at the minimum, environmental impacts and applicable laws and regulations.		
	Yes No	Established priorities, and environmental objectives and targets for continuous improvement in environmental performance and for ensuring compliance with applicable environmental laws, regulations, and permit conditions. Objectives and targets must go beyond current legal requirements and specify the environmental media, types of pollution to be prevented or reduced, implementation activities, and projected time frames.		
	Yes No	An established community outreach mechanism that includes identifying and responding to community concerns; informing the community of important matters that affect the community; and reporting on the EMS, including reporting to the public on the environmental policy and significant aspects.		
	Yes No	Incorporation of environmental and pollution prevention planning in the development of new products, processes, and services and modifications of existing processes.		
	Yes No	Evidence of clear responsibility for implementation, training, monitoring, EMS maintenance, taking corrective action, and ensuring compliance with applicable environmental laws, regulations, and permit conditions.		
	Yes No	Documentation of the implementation procedures and the results of implementation.		
	Yes No	Appropriate written EMS procedures.		
	Yes No	An annual evaluation of the EMS with written results provided to senior management and affected employees.
